Total percentage for installment payments	Single transaction fee + Interest on installment

Note: The effective interest rate for all credit products will be calculated on the basis of CBK regulation. EIR in cash covered loans is calculated with the standard rate for time deposits with 60 months duration. Interest rate, management cost and maximal duration is taken into account For the calculation of EIR in this pricelist

- * Loan prepayments are made in accordance with Law no. 06 / L-034 on Consumer Protection and Mortgage Loans based on the Housing Mortgage Regulation (2016)
- * The calculation of the interest amount for arrears consists of the CBK reference rate over the fixed rate of 8.0%, set by the CBK Regulation on interest rates on credit instruments, so the reference rate will be published by the CBK -ja every six months. On February 1, the rate based on the average for the period July-December is published and is valid for the next period from February 10 to August 9; while on August 1 of the calendar year is published the norm that takes as a basis the average for the period January-June and is valid for the next period from August 10 to February 9. According to the regulation, the unpaid interest rate is not fixed and may change during the loan maturity period, in case the CBK has not published the new reference interest rate as above, the Bank will use the reference interest rate that the CBK- has recently published it
- published it.
 *For all loans with a variable interest rate, the six-month Euribor will be applied.
- *For all other bussiness loans, with the exception of the credit line and overdraft, at the customer's request, a fixed interest rate can be applied, which will be the published variable rate by adding 300 basis points (3.00%).
- *https://bqk-kos.org/wp-content/uploads/2022/12/Rregullore-per-qasje-ne-llogari-pagese-me-sherbime-bazike-.pdf
